

Extend Microsoft Dynamics CRM to meet your Quality, Health, Safety and Environment Challenges.

Microsoft Dynamics CRM has been recognized for years as the best overall platform for businesses to build applications and drive efficiency. **iTrak4** leverages the flexibility, features, and power of the Dynamics CRM platform to uniquely address the needs of **Quality, Health, Safety and Environment** in your business.

Enable Mobility Simply and Cost Effectively

Microsoft Dynamics CRM provides organizations with the strong functionality they need to streamline their processes. Paired with iTrak, this functionality is taken further with the power to build electronic forms within your CRM and **automatically extend to mobile applications**. Access to critical information and workflows whether connected or disconnected from the network is fast and easy for your mobile users. In addition, iTrak forms are accessible through the iTrak Portal which **only requires Microsoft Dynamics Essential Licenses**.

PROVEN SOLUTION

HIGHLY CONFIGURABLE

MOBILE FIRST

Features:

- Available in Cloud or On-Premise
- Leverage CRM Essential Licenses
- Easy to configure custom forms engine
- All forms mobility enabled automatically

On-Premise or In the Cloud; Deploy Quickly

Your business can't afford downtime and your users expect their technology solutions to be up and running quickly. With an iTrak Dynamics CRM solution feel confident in a **deployment that works with your organization**. Hosting in the cloud is a quick way to get a department or subgroup started and realizing the benefits of QHSE automation. Operate your own data centre? iTrak can be deployed on-premise; **all functionally accessible in both environments**.

Reporting with Microsoft Integration

Collecting hazard identifications, inspections, and audits is one aspect of your QHSE system, another is understanding the data and identifying the trends and risks within your business. iTrak integration with Dynamics CRM means you get **all the insight and power of Microsoft reporting tools** like PowerBI and Excel. Moving data to and from your QHSE processes and utilizing charts, graphs, and interactive reporting elements ensure you can **identify issues and risks quickly and easily**.

A Platform That Adapts to Your Business

The greatest tools are ones that adapt to your unique business, not the other way around. iTrak was built with this value in mind enabling you to **maintain and expand your QHSE processes** where it matters. Require another field on an inspection? Need to change a workflow rule? **CRM allows you to modify the platform quickly and easily** with no downtime. Not everyone is going to need these security privileges but those that do, you have the flexibility to configure iTrak to reflect the nuances of your QHSE processes.
