PROVEN
SOLUTION

HIGHLY
CONFIGURABLE

MOBILE
FIRST

The definitive software solution for managing your company's critical internal workflow procedures and Quality, Health, and Safety processes. Pairing modern architecture with a highly configurable layout, organizations can adapt iTrak to their ever changing workflow requirements without the need of technical intervention.

Custom Forms & Documents

Central to the iTrak solution is the ability it gives your organization to configure forms and workflows to your company's internal processes. Trained "Super-Users" will be able to configure and change iTrak to support custom fields and workflows, from employee onboarding to safety meetings, all without requiring technical intervention.

- ✓ User Defined "Smart" Forms
- ✓ Configurable Workflow Engine
- ✓ Field Level Security / Auditing
- ✓ Alerts & Approvals
- ✓ Jobs, Facilities & Equipment
- ✓ Document Library
- ✓ Offline, Web & Mobile Clients

Reporting & Dashboards

Throughout the iTrak system information is constantly being entered, shared, and updated. Business never stops and iTrak provides a central repository for corporate information with monitors for triggering alerts and notifications to loop people into the process as required. Tight integration with Microsoft Office systems provides a familiar and powerful environment for reporting and analysis.

- ✓ Alert & Notification
- ✓ Escalations
- ✓ Audit History
- ✓ Microsoft Office Integration
- ✓ Import/Export Capabilities
- ✓ User Defined Charts, Dashboards & Reports

QHSE

Organizations are challenged to provide processes and tools to maintain safe work environments. iTrak contains the detailed logic and technical capabilities to perform industry standard cause analysis techniques critical to your organizations safety processes. Combining Quality, Health, Safety, and Environment processes with the power of mobile tablets and smart phones provides additional opportunity to encourage broad use and ensuring compliance.

- ✓ Audits & Inspections
- ✓ Incident Management
- ✓ Cause Analysis
- ✓ Risk Assessment
- ✓ Corrective Actions
- ✓ Hazard Identification

Training & Competency Management

At the core of any QHSE and workflow system are people. iTrak comes with a suite of Human Resources tools for managing employee information. Deliver online training, test knowledge with exams and even manage recertification on an individual employee basis. iTrak enables you to track employee competencies, goals and targets, and alerts and notifications to ensure competency.

- ✓ Training & Exams
- ✓ Human Resources Information
- ✓ Standard Operating Procedures
- ✓ Job Safety Analysis
- ✓ Employee Records
- ✓ Job Role Competency Management
